EDUCATION

Vellore Institute of Technology, Chennai

Aug 2023 – Present

B.Tech in Computer Science and Engineering; CGPA: 8.31/10.0

TECHNICAL SKILLS

Programming Languages: Java, C++, C, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, REST APIs

Databases: MongoDB, PostgreSQL

Cloud & Tools: AWS Lambda, Amazon EventBridge, Amazon SES, Git, GitHub, Postman, Vercel

Core CS Subjects: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Software Development Intern

3rd June – 3rd July

Prozo

Gurugram

- Developed backend automation workflows using Node.js to streamline recurring reporting tasks
- Designed MongoDB Aggregation Pipelines to generate merchant and shipment reports for business analysis
- Automated scheduled data-processing workflows using AWS Lambda and Amazon EventBridge, reducing manual effort
- Integrated REST APIs to enable seamless data exchange between internal backend services
- Configured Amazon SES for automated transactional email notifications within backend pipelines
- Collaborated with cross-functional engineering teams in an Agile environment, using Git for version control

PROJECTS

AI Mock Interview Platform

GitHub

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Drizzle ORM, Vapi AI

- Engineered a full-stack AI-powered mock interview platform using Next.js, React, and TypeScript with a responsive Tailwind CSS UI
- Implemented secure authentication and session management using Clerk Authentication
- Designed a PostgreSQL schema with Drizzle ORM to persist user profiles, interview sessions, and interview history
- Integrated Gemini AI/OpenAI API to dynamically generate role-specific interview questions and personalized AI feedback
- Built real-time, voice-based interview simulations using Vapi AI for natural conversational practice
- Deployed the production-ready application on Vercel with continuous integration for seamless updates

Phishing URL Detector

GitHub

Tech Stack: Java, Spring Boot, React.js, Tailwind CSS, Weka, Jsoup

- Built a real-time phishing detection system using a Random Forest model (50 trees, 10-fold cross-validation) across 6 URL features
- Developed a Spring Boot REST API for URL scanning, scan history, and model benchmarking, integrating Jsoup for HTML extraction and Weka for ML inference
- Designed a React and Tailwind CSS frontend featuring a real-time risk meter and scan history dashboard, deployed via Vite

Automated Attendance System – Rural Edufy

GitHub

Tech Stack: React.js, Node.js, Express.js

- Built a full-stack platform automating attendance tracking, mid-day meal monitoring, staff substitution, and student performance analysis for rural schools
- Implemented a Node.js and Express.js backend to calculate attendance percentages, trigger defaulter alerts below 75%, and automate teacher substitution logic
- Designed a low-bandwidth-optimized React.js UI, validated across 7 classes and 3 sections (33–40 students each)

ACHIEVEMENTS

2nd Place – GlitchCon Hackathon, VIT Chennai

March 2025

- Secured 2nd position in a national-level hackathon by building a real-time collaboration platform; led a 4-member team through ideation, full-stack development, and final pitch within a 36-hour sprint

CERTIFICATIONS

Java Programming – Professional Certification

- * Completed a professional certification covering OOP, data structures, exception handling, and multithreading in Java
